Konference

Særlige samarbejdsområder for RM

- Klimatilpasning og vandområdet
- Cradle 2 Cradle, cirkulær økonomi og affaldshåndtering

Klimatilpasning i RM

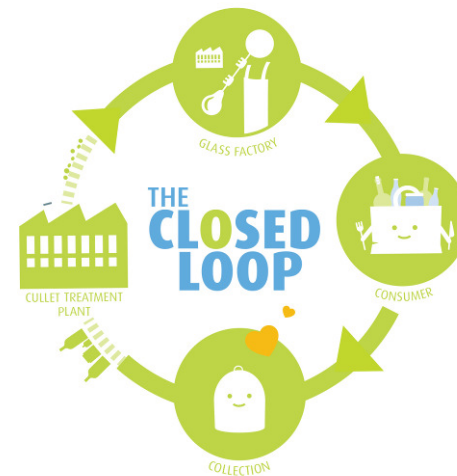

Alliance Nr.1

- ***Best practises on climate change especially the defence against flooding and the cross-border cooperation on the rivers***
 - *Youth demand: Do not hand over the problems resulting from climate change to us and our children. Act as soon as possible. Because it is your responsibility!*

Alliance nr. 2

- ***Combating Climate Change - Decision making structures and political tools needed for conflict solution and local involvement***
 - *Demand from Youth: It's not enough to adapt to climate change. We have to stop it now!*

Cradle 2 Cradle og affaldshåndtering

Alliance nr. 4

- ***Cradle 2 Cradle and waste management***
 - *Demand from the Youth: The demand of recycling is more relevant than ever before. This is a problem that can be solved with smart design. It is a question of making optimal use of the infrastructure that already exists (→ the infrastructure of the recycling stations). If the industry starts designing and engineering smarter, the recycling stations can be their perfect source of cheap raw materials, located right where the industry needs them – in the cities.*
